

## 1 Introduction

As shown in previous studies Cáceres and Cáceres-Saez [2010], Namba and Minami [1989], the dynamics of population matrices can be complex.

## 2 Methodology

The control of chaos in mechanical systems has also been explored Orozco-Fuentes and García [2007].

## 3 Results

Adaptive dynamics in ecological models have been studied in depth Metz and Geritz [2004].

My take is, just don't do bibs in vscode. Do it in overleaf...
